COILED TUBING ROLL-ON CONNECTOR

CONTENT

- **♦Introduction of ROLL-ON CONNECTOR**
- **♦**Connect
- **♦** Disconnect

Introduction:

The Coiled Tubing Roll-On Connector allows the attachment of Coiled Tubing to the CT Tool / Work String via the provision of a threaded connection.

معرفي:

الله این ابزار به لوله مغزی اجازه اتصال به ابزار درون چاهی از طریق یک رزوه داده می شود

> Required hand tools

Connect:

Welding line

Rasping the welding line inside the coiled tubing by file to remove it

نحوى اتصال:

خط جوش داخل لوله مغزی را سوهان کشیده و از بین می بریم

Measuring the distance of connector's profiles by caliper

Α

В

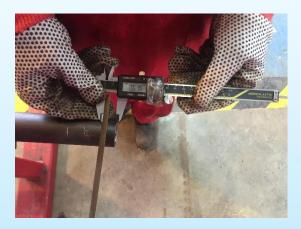

Marking the measured distances on the coiled tubing

Α

В

D

Running the Roll-on connector into the coiled tubing and hit by hammer to fix it

Α

В

D

Take the Roll-On Connector Crimping Tool fitted with the crimping wheel and place on the tubing above the connector profile(before marked), Slowly tighten and rotate the crimping tool until the tubing has been fully swaged into the connector profile. Repeat this procedure until the tubing has been swaged into all of the connector's profiles...
